

epilXcel™

The definitely different depilation.

The target of the *epilXcel™* professional depilation consists in the progressive and permanent disappearance of unwanted hairs.

The secret?

Thanks to its trypsin suractivated complex rich in recognized keratolytic properties, *epilXcel™* acts directly on the pilous follicle .

Suprising results!

By reducing the germinal cells multiplication at the level of the pilous follicle, *epilXcel™* reveals its maximum efficiency when the hair stands in growing phase (anagen).

EpilXcel™ is:

- **Efficient:** on all skins and hairs types (even white hairs)
- **Economic:** democratic price
- **Easy:** fast and easy application on depilated areas, at your beauty professional center.

EpilXcel™ may also be used to enhance other depilation methods (IPL, Laser, ...)

The anti-regrowth hair treatment.

epilXcel™

The definitely different depilation.

epilXcel™

At the beauty salon

Easy and efficient for all!

The *epilXcel™* professional treatment may be applied on all skin types and areas. Should you have a mediterranean complexion or a nordic tone, *epilXcel™* acts on thin, thick, light, dark or white hairs.

EpilXcel™ in practice?

After each depilation, your beauty professional applies *epilXcel™* on the depilated area. A light massage will help in the penetration. The treatment frequency depends on your depilation sessions till obtention of expected results.

EpilXcel™ does not enter the different skin layers nor the blood circulation. It does not affect collagen fibers nor dermis elastic fibers.

Small advice: As for any other depilation treatment, avoid sun and solarium exposure

The definitely different depilation.

For woman and a man.

epilXcel™

At home

EpilXcel™ Retard extends and reinforces the action of the *epilXcel™* professional treatment.

The secret?

Thanks to its NDGA (*Larrea divaricata*) component, *epilXcel™ Retard* reduces the cell multiplication at the level of the pilous follicle and acts as anti-inflammatory and moisturizer.

Use?

Apply *epilXcel™ Retard* every morning and evening for the 3 to 5 days after the depilation.

The definitely different depilation.

EpilXcel™ Retard, anti-regrowth care.
